PROFESSIONAL SUMMARY

Results-driven Software Developer with hands-on experience in full-stack web development using React.js, Node.js, JavaScript, and Python. Proven ability to build scalable REST APIs, integrate speech-to-text systems, and deploy responsive web applications. Skilled in data structures, OOP, and agile workflows. Seeking a Software Developer role to deliver high-impact, user-centric solutions.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), HTML5, CSS3, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS

Databases: MongoDB, SQL (Relational)

Tools & Platforms: Git, GitHub, VS Code, Postman, REST APIs

Concepts: Data Structures & Algorithms, OOPs

PROJECTS

Voice-Based Digital Prescription System

React | Python | Flask | Speech Recognition

- Engineered a full-stack voice-enabled prescription system using React.js and Flask, reducing manual prescription entry time by ~60%.
- Integrated speech-to-text API to accurately capture doctor speech and auto-extract fields: medicine name, dosage, frequency, and duration.
- Developed and deployed RESTful APIs with Flask for data validation, drug interaction detection, and allergy conflict flagging.
- Achieved 95%+ prescription field extraction accuracy by testing across 50+ real-world medical instruction samples.

Instagram Clone Web Application

React | Node.js | Express.js | MongoDB

- Built a feature-complete social media web application with secure JWT-based user authentication and authorization.
- Implemented real-time post, like, and comment functionality, boosting user engagement through seamless, low-latency interaction.
- Designed a fully responsive UI using React.js to support both mobile and desktop devices, ensuring consistent cross-browser compatibility.
- Built scalable backend endpoints using Node.js and Express.js with MongoDB as the NoSQL database.

INTERNSHIP EXPERIENCE

Software Developer Intern — MaGa Tech Gramam Pvt Ltd

Dec 2025 – Jan 2026

- Developed backend functionalities for a **Voice-Enabled AI-Based Digital Prescription System** using **Python Flask**, enabling real-time prescription processing and validation workflows.
- Integrated **Faster Whisper** for speech-to-text conversion and **spaCy MED7** for extracting structured medical details such as medicine name, dosage, frequency, and duration.
- Built REST APIs for patient search, audio upload, prescription safety validation, and digital prescription PDF generation with proper error handling.
- Implemented a rule-based clinical safety engine to detect drug–drug, drug–allergy, and drug–condition interactions, improving prescription accuracy and patient safety.

EDUCATION

B.Tech – Artificial Intelligence and Data Science

2022 – 2026

Francis Xavier Engineering College, Tamil Nadu

CERTIFICATIONS

- NPTEL – The Joy of Computing Using Python
- Infosys Springboard – JavaScript Programming Certificate
- Skillrack – Python Programming Certificate (2022)
